COMMENTS:

This is not my first comment, nor the last. I feel the DOE
is pushing this project down the throats of Americans,
many of them unaware of what Yucca Mt. is all about.
This should be voted on by all the voters of America.
Our government representatives are not always in tune of
what "the People" want. It is so unfair to continue
this project and waste millions of taxpayers dollars.
There are other options this money could go to —
TRANSMUTATION! You are hiding the transportation
dangers from America. We in Nevada are very aware,
but the rest of the nation is NOT! Please find out
what America truly wants — I know it's NOT THIS!

Please note: Your comment(s) must be received by the Department of Energy by June 1, 2004 to be considered. Comments received after the close of the comment period will be considered to the extent practicable.

If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so the address and postage-paid notice are visible, then secure with tape.

Please feel free to attach additional pages (if mailing, more postage may be needed).
